Abstract

Online Complaint Management System provides an online way of solving the problems faced by the public by saving time and eradicating corruption.

The objective of the complaints management system is to make complaints easier to coordinate, monitor, track, and resolve, and to provide the company with an effective tool to identify and target problem areas, monitor complaints handling performance and make business improvements.

Online Complaint Management is a management technique for assessing, analysing, and responding to customer complaints. Complaints management software is used to record resolve and respond to customer complaints, and requests as well as facilitate any other feedback.
